

To whom it may concern:

K-Love has served in my residential community for about five years. Because we live in a very rural location, the importance of their programming is critical to our values as a family and community. Without K-Love our choices of family programming is extremely limited. K-love supports wholesome values and has a positive and encouraging impact on our community. As an American citizen, the freedom to choose is very important to our democracy. I am concerned that if an LPFM broadcaster provided programming we may lose our wonderful choice. Please do not let this happen!
